USE CASE ARMOR MDR

PCI Certification with a Scalable, Compliant SOC

Fintech meets compliance requirements to support sensitive transaction processing

ARMOR

COMPANY OVERVIEW

NexoraPay (pseudonym) is a leading financial technology provider in Southeast Asia, delivering secure, cloud-native banking and payment infrastructure for regional financial institutions. With a focus on innovation and regulatory readiness, NexoraPay built a cloud-based Security Operations Center and achieved **PCI DSS certification** with Armor, solidifying its role as a trusted, scalable partner in the FinTech ecosystem.

- **Industry:** FinTech/Financial Services
- **Company Size:** 251-500
- **Technologies:** Azure
- **Solution:** Armor MDR, Microsoft Sentinel

BUSINESS CHALLENGE

NexoraPay, a fast-growing financial services technology provider, powers digital banking and payment solutions for top-tier financial institutions across Southeast Asia. As demand for its services grew, NexoraPay needed to strengthen its security operations and meet strict compliance requirements, particularly **PCI DSS certification**, to support sensitive transaction processing.

SOLUTION

To build a compliant, cloud-based SOC, NexoraPay partnered with Armor, using its **Armor Managed Detection and Response** solution alongside Microsoft Sentinel.

- Deploy Microsoft Sentinel and Azure Log Analytics

- Ingest and normalize security logs from across NexoraPay's environment

- Build a centralized security dashboard for monitoring, detection, and compliance

- Accelerate audit readiness with out-of-the-box connectors and expert tuning

ARMOR

BUSINESS OUTCOMES

In under **six months**, NexoraPay:

- **Achieved PCI DSS certification**

- Gained **real-time visibility** and centralized control over its security operations

- Built a **future-ready SOC** without overextending internal resources

CONCLUSION

With Armor's MDR expertise and Microsoft Sentinel's scalability, NexoraPay is positioned to scale securely without sacrificing speed, visibility, or compliance.

> We knew that whatever security solution we put into place it had to be simple. We needed to ensure we had the best level of protection available, so we turned to Armor and Microsoft Sentinel.
